## Chevrolet Sedan, Hard Top & Wagons 1955-1957 Products

\* Acme has made headliners since 1949. Our patterns and color information was compiled when the cars were first introduced and have been in continual use since that time. In addition to our regular line of reproduction headlining we stock over 1,000 colors of New Old Stock Headlining.

\* We catalog what is most common and original however, we will make any headliner out of any material and any color at the customer request.

\* All items listed below are by Year, Model and Material

\* If Headliner only is ordered material for Sunvisors and Quarter/Sail Panels is included as needed.

Headliners are "Sewn Ready to Install, Tailored to Fit". Metal bows are transferred from old headliner. There is a center line drawn on the back side of headliner to assist in alignment. There is 3" of excess material all around perimeter for stretching and trimming.

Windlace sold separately - see last page of application guide.

Models with Exposed Chrome Bows have cardboard strips sewn on face side as original.

Sunvisors are made as original, sewn with double fold binding. Cloth sunvisors have "Finger Tab Patch" in contrasting vinyl. Brackets not included. See below for applications.

All Headliners and Sunvisors listed below are available in the following materials. Please add color number to end of part number when ordering.

**Note: 1973-79 Foam Back Perforated Vinyl was used in all years.**

**Note: 1977-79 was made with a cloth interior and used Cloth Headliners as shown below.**

**Note: Headliner is one piece board style (not bow supported) and is available in three (3) forms.**

1. Scrape & Cover Kit - If the old headliner is restorable (intact and not damaged) this kit is recommended.
2. Conversion Headliner - If the old headliner is damaged (beyond repair) or missing, this headliner is the best method. The old headliner may be discarded, support bows are included and fitted to the roof (drilling is required). The new headliner is glued in, much like an earlier bow supported installation. No special tools are required; instructions included.
3. ABS Plastic Board that is a reproduction of the original.
