

## Sunvisor Application Guide

**Acme Auto Headlining Company manufactures the highest quality sunvisors available in the market today. For over 15 years Acme has provided sunvisors for all makes and models of cars and trucks. Please note that car and truck owners taking their vehicles to Concours Car Shows choose Acme Sunvisors as their vehicles are judged for originality, workmanship and quality. We do not hesitate to use high quality materials to produce our products.**

**We use Medium Density Fiberboard engineered under high temperature and pressure that combines wood fibers, wax and resin to produce an inner structure that is flexible and strong.**

**All inner boards have edges beveled and routed to insure the binding is firmly nested against the edges of the visor.**

**We use Clay Coated Chipboard that is better than the original because it is moisture resistant and doesn't warp as the original was an untreated cardboard product. Further, the Clay Coated Chipboard allows the binding to be sewn straight.**

**All metal channels are Galvanized Steel, rust resistant, and are attached to the Fiberboard using a pneumatic rivet machine for strength and long life.**

**All rivets are Steel Metal Piercing and have a rust resistant Zinc finish.**

**All visor pins are heavy duty Steel, Zinc plated and securely welded in the correct position as original.**

**All materials are laminated to each other to prevent separation.**

All sunvisors are manufactured by Acme using new materials inside and out. Brackets are not included but are available for some models. The original materials are no longer available for older model vehicles. Please choose from our sample cards or send in your own material. Please see last page of guide for pricing and available options.

For years Acme Auto Headlining Company has offered the highest quality new Sunvisors and Sunvisor Recovery Program available to the restoration market. Acme is continually adding new Sunvisors and Sunvisor hardware to its offerings. If you don't find what you need listed here, please call us and ask as we may have added it since the catalog was printed. Please see the end of this guide for optional upgrades and Sunvisor Recovery Information.

**Materials Legend: M = Madrid, S = Sierra, B = Bedford, L = Linedot, P = Premier, T = Tier, BW = Basketweave, R = Recessed Star Nap = Napped Cotton, FB = Foamback Cloth, ST = Starline, C = Crater, CO = Corinthian, CRH = Crush Grain Headlining Material**

## AMX / Javelin

Year	Description	Material	Part No.
